PRODUCT SHEET

Woven Throw Blanket

JVI's woven throw blanket has many uses. Depending on the design purpose it can be a valuable promotional advertising item or be designed with conventional home use in mind. In the home it can be seen on a bed footboard, sofa, at bed reading a book, watching movies, anywhere you can imagine.

Dye sublimation is the method of applying an image to specially coated substrates, using three main ingredients: sublimation ink, heat and pressure. We take your art in digital form printing it to dye-sub paper. The printed paper is then aligned with the sublimation media like fleece, textile, various man-made fabrics, and run through heat and pressure to create the final product. Under heat & pressure these dyes, in gas form, are absorbed and encapsulated with pinpoint accuracy into the substrate. The result is a permanent printing which will not wear off, and is washable.

It is printed edge to edge for impactful designs and creates a large advertising surface to display a high quality, impactful full color graphic message.
